

**ESTUDIA EN FH UPPER AUSTRIA!** 

I decided to stay in Austria because during my studies, I was able to get to know the culture, how funny Austrians can be and found some similarities with my own culture. Most importantly, during my studies I was given the opportunity to do my thesis and internship with a company, in an area that I am fully interested and with activities that keep me motivated and engaged. At the end of my internship, they offered me a job as Junior Product and Project Manager to develop not only the business intelligence for the company but some projects that goes hand to hand with my personal believes.

I decided to apply to this university because I wanted to make **a positive impact** once I graduate. I found the program very broad, combining technical subjects with energy projects — it's a very globalized way of learning. You get to work with different professors, different nationalities and everyone has different perspectives and bring interesting ideas to the table

María Fernanda, Sustainable Energy Systems, Hermosillo/Mexico

### **TESTIMONIALS**

After finishing high school, I decided that I wanted to study abroad, I wanted to **get out of my comfort zone**. When I found this course, I knew it would be perfect for me. There are a wide range of cultures and languages, which has helped me to open my mind to different experiences. Having the course in English is also a plus, as this lets me communicate with people from other countries inside and outside school.

Mariana, Global Sales & Marketing, Mexico

José, Medientechnik und Design, Mexico

### **TESTIMONIALS**

After 4 years working, I decided to study, beside of the fact that cars are my passion, I found this master suitable to expand my knowledge about electronic systems in the vehicles therefore the management topics are relevant for me because I had the chance to relate the concepts with the activities I did in my last job. Professors are supportive so it is always possible to solve any question that we have

I can say that **living in Austria is such a nice experience** in my life, I have found beautiful places where I can run, workout and I love hiking in beautiful places with my friends. I'm living in Wels which is a beautiful small city, I like it a lot because I can walk to every place I want to go.

Brianda, Automotive Mechatronics and Management, Edo. Mxo/Mexico

I studied Electrical Engineering, Bachelor and Waster, and while it was a bit tough it was also manageable. If you don't put in any effort you won't get the results! What I liked was the international and multicultural environment, there were Mexicans, Brazilians, Turkish, Syrians and Germans in my class, just to name a few. Now I work at the FH as a researcher.

Sebastián, Electrical Engineering, Cancún/Mexico

### **TESTIMONIALS**

6,000 students | 20,000 graduates
