- Security, analysis & privacy
- State-of-the art methods and tools (for generating and analysing digital data)

DIA graduates are well prepared for international careers with a focus on digital environments.

*Educating global leaders since 1754*

## STUDY TRIPS

**Participate in various study trips for a unique educational experience**

The DA's study trips provide deep insights into the politics, economy, history and culture of important cities and regions. From Brussels to the capitals of the Western Balkan Region.

*'Our visit to Brussels was a fantastic opportunity to observe the inner workings of a significant political city. Our excursions to the three main EU institutions and NATO headquarters as well as the Austrian Permanent Representation were insightful experiences for our diverse student body. Between our daytime agenda, the DA alumni networking event and our free time in the evenings, we gained an inside perspective on working and residing in this international hub. Overall, it was a great bonding and learning experience!'*

**Jonna Gazzola**
